

# THE FUTURE OF POWER IN LA

## Schedule

### Phase I

June 18, 2019 – Summer 2020

### Phase II

2020 – detail to be provided

## Work Hours

Monday – Friday

9:00am to 3:30pm

Saturday

8:00am to 6:00pm

Weekend prep time begins at 6:00am but construction will not begin until 8:00am

## Area

Bel Air / Beverly Crest /  
Westwood / Holmby Hills  
Council District 5

# Bel Air Power Upgrade Project

## Phase I: Sunset Blvd.

LADWP is working hard to make important electric infrastructure improvements in the greater Bel Air area to markedly improve power reliability. The community's patience and understanding are greatly appreciated during this critical infrastructure upgrade.

### Project Description

LADWP will install additional underground power lines to upgrade infrastructure and improve reliability for the Bel Air, Beverly Crest, Westwood, and Holmby Hills communities. These areas have experienced significant reliability issues due to increasing demand. The circuits servicing these communities are operating at 120% over capacity and this overload will be addressed by the installation of additional circuits.

Four new underground circuits and a total of 27,138 feet of new cable will be installed. See map on page 2.

In order to minimize traffic impact, construction will take place in two phases. Phase I is on Sunset Blvd and will begin summer 2019.

Phase II is expected to begin in 2020 and will include several streets: Bellagio Rd, Chalon Rd, Bel Air Rd, and S. Beverly Glen Blvd. More details about Phase II will be provided at a later date.

### Phase I Construction:

Phase I construction will be in two different areas on Sunset Blvd:

- Sunset Blvd between the 405 freeway and Bellagio Rd.
- Sunset Blvd between S. Beverly Glen Blvd and Carolwood Dr.

During work, at least one lane will remain open in each direction to maintain both eastbound and westbound traffic flow. At the end of each work day, all lanes will be restored to traffic.

Construction will involve excavating and trenching to install new conduit and cable. Traffic control measures will be implemented to mitigate traffic impact, including the use of changeable message boards and flaggers to assist with traffic flow.

**Phase I construction will begin on Tuesday, June 18, 2019 and will be completed by summer 2020.**
